VIOLENT DEATH IN NORTH CAROLINA: CONGRESSIONAL DISTRICT 1, 2024

- An estimated 747,584 North Carolina residents reside in Congressional District 1.
- In 2024, there were 196 violent deaths from injuries sustained by individuals living in Congressional District 1.
- The majority of decedents were residents of Craven (11.7%), Edgecombe (9.7%), Halifax (9.7%), and Nash (9.7%) counties.

Manner of Death: Congressional District 1, NC*

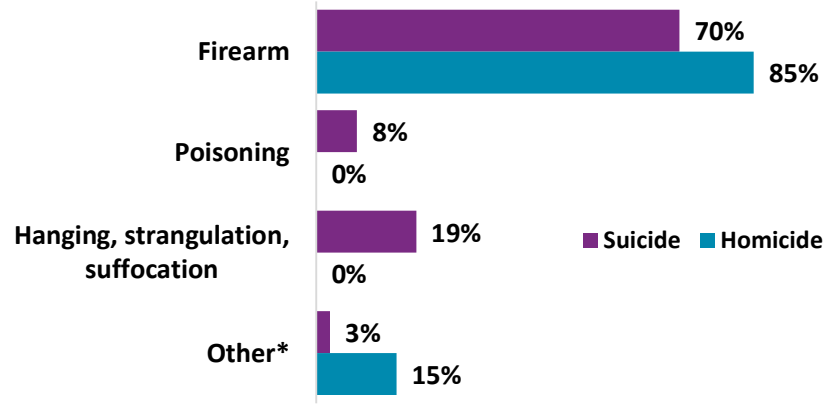

*Based on the residential address of the victim

- There were 114 suicides (58.2%), 71 homicides (36.2%), zero unintentional firearm deaths (0.0%), three deaths from legal intervention (1.5%) and eight deaths of undetermined intent (4.1%).

- Firearms were involved in 70.2% of suicides and 84.5% of homicides.
- Among homicides caused by firearms, 68.3% were caused by handguns, 5% by shotguns, and 8.3% by rifles.
- Among suicides caused by firearms, 83.8% were caused by handguns, 12.5% by shotguns, and 2.5% by rifles.
- The second leading method of death for suicide was hanging, strangulation, or suffocation (19.3%).

Firearms were involved in 75.7% of all homicide and suicide deaths

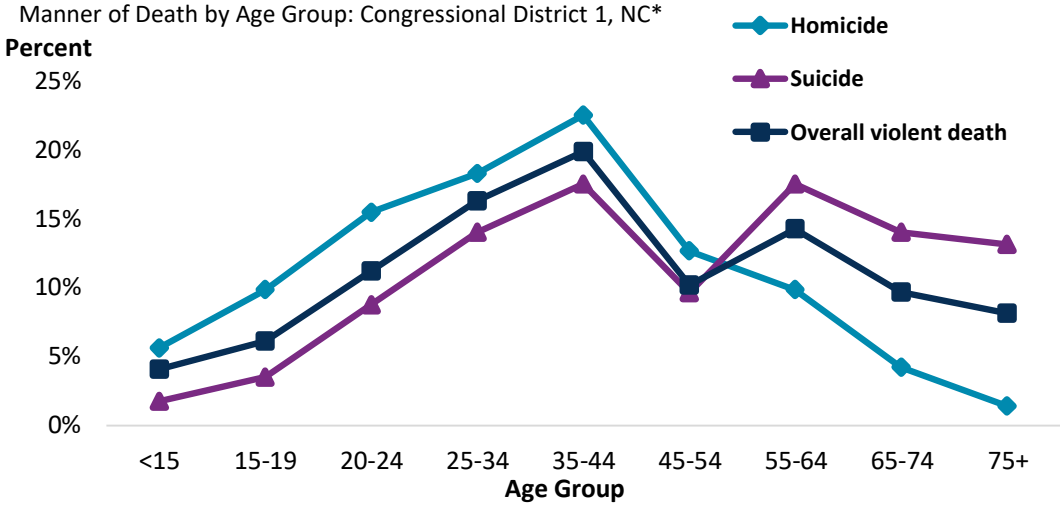

Method of Death: Congressional District 1, NC*

*Other includes falls, motor vehicle, sharp instrument, fire/burns, unknown and other methods

The North Carolina Violent Death Reporting System (NC-VDRS) is a CDC-funded statewide surveillance system that collects detailed information on violent deaths that occur in North Carolina, including homicide, suicide, unintentional firearm deaths, legal intervention and deaths of undetermined intent. NC-VDRS triangulates information from death certificates, medical examiner reports, and law enforcement reports to understand and aid in the prevention of violent deaths. Data reported in this document are based on residential address of the victim and, instead of a rate, the ratio is reported. This document summarizes fatal injuries from violence that occurred in Congressional District 1 for the year 2024. Since not all deaths resulting from violence are able to be geocoded, the violent death numbers represented in this fact sheet may be slightly underestimated.

Manner of Death by Age Group: Congressional District 1, NC*

*Age group percents are taken of total homicide, total suicide and total overall violent deaths

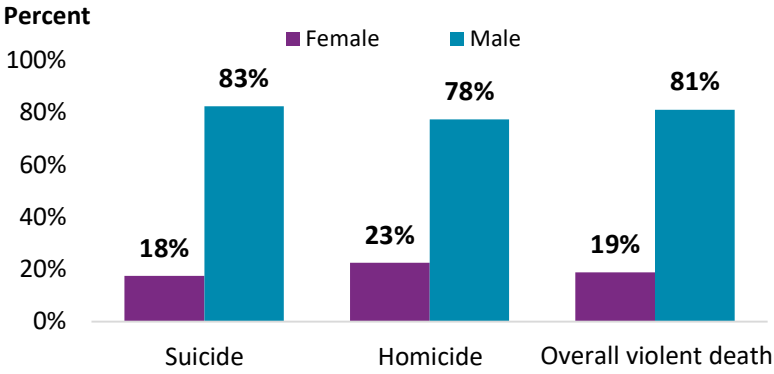

• Suicides and homicides displayed different age patterns after ages 45-54.

• However, both homicides and suicides peaked among those 35-44 with 22.5% of total homicides and 17.5% total suicides.

• Percentage of overall violent deaths peaked among those 35-44 at 19.9% of total violent deaths.

Males have higher proportions of violent deaths than females

Manner of Death by Sex: Congressional District 1, NC*

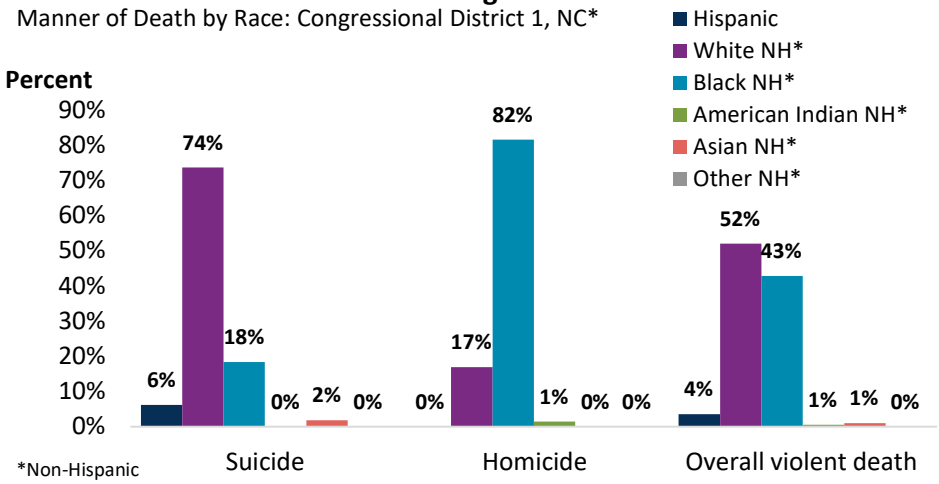

• The majority of suicide and homicide victims were male. There were 94 male suicide victims and 55 male homicide victims, which accounted for 82.5% and 77.5% of victims, respectively.

• There were 20 female suicide victims and 16 female homicide victims, which accounted for 17.5% and 22.5% of victims, respectively.

Uneven distributions are seen among race and manner of death

Manner of Death by Race: Congressional District 1, NC*

*Non-Hispanic

• Patterns of suicide and homicide differed by race. 73.7% of suicide victims were Non-Hispanic (NH) White while only 18.4% were NH Black.

• In contrast, 81.7% of homicide victims were NH Black, and 16.9% were NH White.

• Overall, there were 7 (3.6%) Hispanic, 102 (52.0%) NH White, 84 (42.9%) NH Black, 1 (0.5%) NH American Indian, and 2 (1.0%) NH Asian victims.

The North Carolina Violent Death Reporting System is supported by Cooperative Agreement 5NU17/CE924955-02-00 from the Centers for Disease Control and Prevention (CDC).
