Firearms were involved in 68.8% of all homicide and suicide deaths

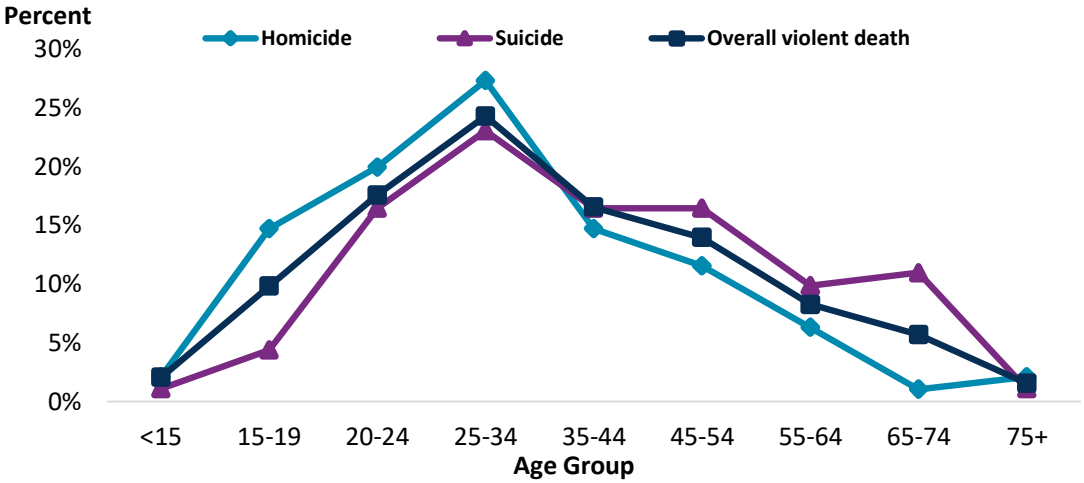

Method of Death: Congressional District 12, NC*

*Other includes falls, motor vehicle, sharp instrument, fire/burns, unknown and other methods

The North Carolina Violent Death Reporting System (NC-VDRS) is a CDC-funded statewide surveillance system that collects detailed information on violent deaths that occur in North Carolina, including homicide, suicide, unintentional firearm deaths, legal intervention and deaths of undetermined intent. NC-VDRS triangulates information from death certificates, medical examiner reports, and law enforcement reports to understand and aid in the prevention of violent deaths. Data reported in this document are based on residential address of the victim and, instead of a rate, the ratio is reported. This document summarizes fatal injuries from violence that occurred in Congressional District 12 for the year 2024. Since not all deaths resulting from violence are able to be geocoded, the violent death numbers represented in this fact sheet may be slightly underestimated.

Manner of Death by Age Group: Congressional District 12, NC*

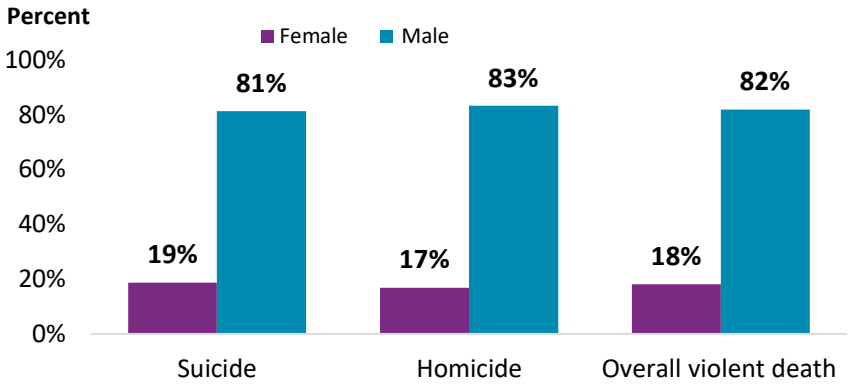

*Age group percents are taken of total homicide, total suicide and total overall violent deaths

- Suicides and homicides displayed similar age patterns until ages 65-74.
- Both homicides and suicides peaked among those 25-34 with 27.4% of total homicides and 23.1% total suicides.
- Percentage of overall violent deaths peaked among those 25-34 at 24.4% of total violent deaths.

- The majority of suicide and homicide victims were male. There were 74 male suicide victims and 79 male homicide victims, which accounted for 81.3% and 83.2% of victims, respectively.
- There were 17 female suicide victims and 16 female homicide victims, which accounted for 18.7% and 16.8% of victims, respectively.

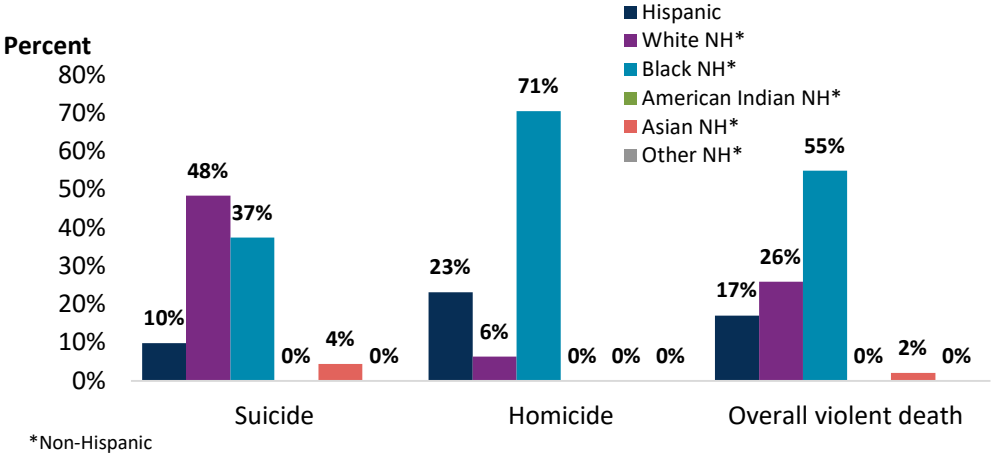

Males have higher proportions of violent deaths than females

Manner of Death by Sex: Congressional District 12, NC*

Uneven distributions are seen among race and manner of death

Manner of Death by Race: Congressional District 12, NC*

*Non-Hispanic

- Patterns of suicide and homicide differed by race. 48.4% of suicide victims were Non-Hispanic (NH) White while only 37.4% were NH Black.
- In contrast, 70.5% of homicide victims were NH Black, and 6.3% were NH White.
- Overall, there were 33 (17.1%) Hispanic, 50 (25.9%) NH White, 106 (54.9%) NH Black, 0 (0.0%) NH American Indian, and 4 (2.1%) NH Asian victims.

The North Carolina Violent Death Reporting System is supported by Cooperative Agreement 5NU17/CE924955-02-00 from the Centers for Disease Control and Prevention (CDC).
