NC Violent Death Reporting System

VIOLENT DEATH IN NORTH CAROLINA: CONGRESSIONAL DISTRICT 9, 2024

- An estimated 765,958 North Carolina residents reside in Congressional District 9.
- In 2024, there were 184 violent deaths from injuries sustained by individuals living in Congressional District 9.
- The majority of decedents were residents of Cumberland (23.4%), Alamance (22.3%), and Randolph (15.8%) counties.

Manner of Death: Congressional District 9, NC*

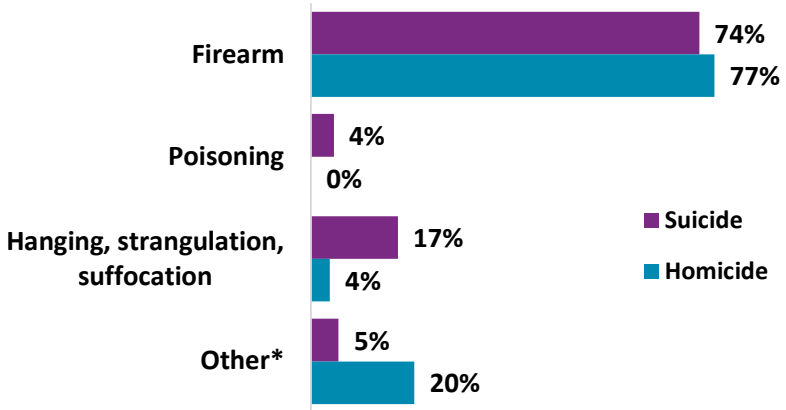

*Based on the residential address of the victim

- There were 115 suicides (62.5%), 56 homicides (30.4%), four unintentional firearm deaths (2.2%), five deaths from legal intervention (2.7%) and four deaths of undetermined intent (2.2%).

- Firearms were involved in 73.9% of suicides and 76.8% of homicides.
- Among homicides caused by firearms, 74.4% were caused by handguns, 4.7% by shotguns, and 7% by rifles.
- Among suicides caused by firearms, 87.1% were caused by handguns, 5.9% by shotguns, and 7.1% by rifles.
- The second leading method of death for suicide was hanging, strangulation, or suffocation (16.5%).

Firearms were involved in 74.9% of all homicide and suicide deaths

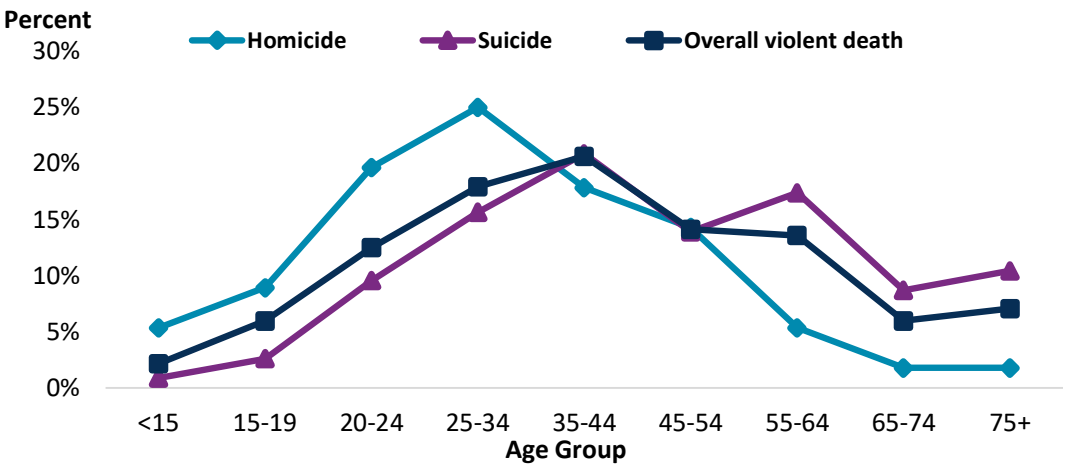

Method of Death: Congressional District 9, NC*

*Other includes falls, motor vehicle, sharp instrument, fire/burns, unknown and other methods

The North Carolina Violent Death Reporting System (NC-VDRS) is a CDC-funded statewide surveillance system that collects detailed information on violent deaths that occur in North Carolina, including homicide, suicide, unintentional firearm deaths, legal intervention and deaths of undetermined intent. NC-VDRS triangulates information from death certificates, medical examiner reports, and law enforcement reports to understand and aid in the prevention of violent deaths. Data reported in this document are based on residential address of the victim and, instead of a rate, the ratio is reported. This document summarizes fatal injuries from violence that occurred in Congressional District 9 for the year 2024. Since not all deaths resulting from violence are able to be geocoded, the violent death numbers represented in this fact sheet may be slightly underestimated.

Manner of Death by Age Group: Congressional District 9, NC*

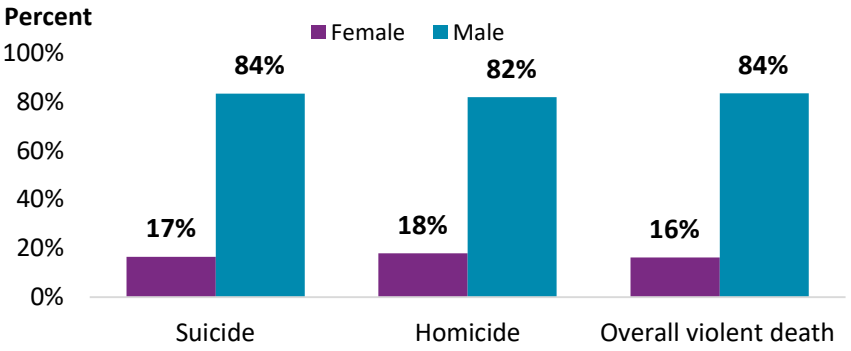

*Age group percents are taken of total homicide, total suicide and total overall violent deaths

- Suicides and homicides displayed different age patterns.
- Percentage of total homicides peaked among those 25-34 with 25.0% of total homicides, where percent of total suicides peaked among those 35-44 with 20.9% of total suicides.
- Percentage of overall violent deaths peaked among those 35-44 at 20.7% of total violent deaths.

- The majority of suicide and homicide victims were male. There were 96 male suicide victims and 46 male homicide victims, which accounted for 83.5% and 82.1% of victims, respectively.
- There were 19 female suicide victims and 10 female homicide victims, which accounted for 16.5% and 17.9% of victims, respectively.

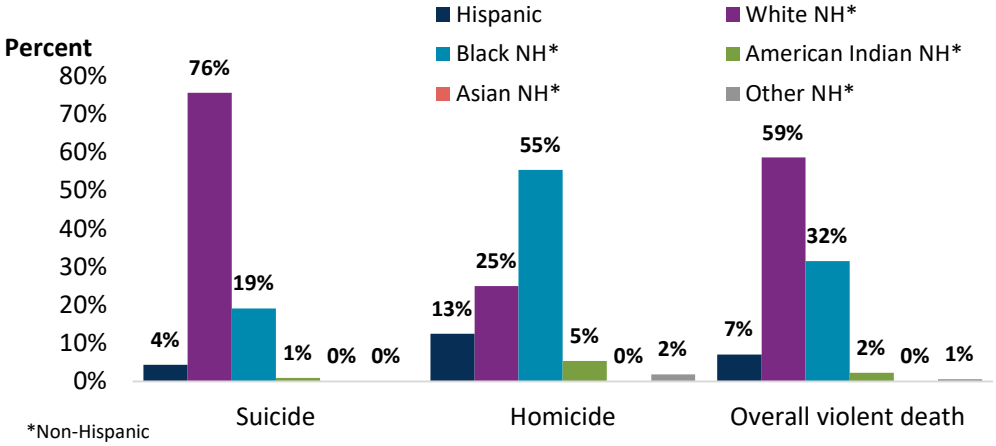

Males have higher proportions of violent deaths than females

Manner of Death by Sex: Congressional District 9, NC*

Uneven distributions are seen among race and manner of death

Manner of Death by Race: Congressional District 9, NC*

*Non-Hispanic

- Patterns of suicide and homicide differed by race. 75.7% of suicide victims were Non-Hispanic (NH) White while only 19.1% were NH Black.
- In contrast, 55.4% of homicide victims were NH Black, and 25.0% were NH White.
- Overall, there were 13 (7.1%) Hispanic, 108 (58.7%) NH White, 58 (31.5%) NH Black, 4 (2.2%) NH American Indian, and 0 (0.0%) NH Asian victims.

The North Carolina Violent Death Reporting System is supported by Cooperative Agreement 5NU17/CE924955-02-00 from the Centers for Disease Control and Prevention (CDC).
