**Nicotine Replacement Therapy (NRT) Dispensing Protocol**

|  |   |   |  |
|--|---|---|--|
| <b>Eligible Candidates</b>   | Any person currently using nicotine containing products, who indicate a readiness to quit.<br>This standing order may be used for persons < 18 years of age with a parent or legal guardian consent.  |   |  |
| <p><b>Initiate therapy based on maximum use of nicotine/ day at therapy initiation</b></p> <p>*Combination Nicotine Replacement therapy is strongly recommended. Monotherapy may also be appropriate. *Therapy choice should be based on time to first use, quantity, patient preference and comorbidities, data from past attempts, and desired quit date.</p> <p>NRT use in women who are pregnant or breastfeeding: the patient should be educated on the risks of smoking or vaping versus the unknown risks of NRT. If the patient consents to NRT, then intermittent delivery formulations (gum, lozenge or inhaler) are believed to be safer than continuous delivery (avoid use of Transdermal Dermal patch). If the patient is pregnant, educate on importance of</p> | <p><b>High Nicotine Use*^</b><br/>11+ cigarettes per day OR ≥2 cans or pouches per week of snuff or chew OR 6-12+mg/mL e-liquid</p>   | <p><b>Medium Nicotine Use*^</b><br/>5-10 cigarettes per day OR<br/>1 to 2 cans or pouches per week of snuff or chew OR 3-6mg/mL e-liquid</p>  | <p><b>Low Nicotine Use*^</b><br/>0-4 cigarettes per day OR less than 1 can or pouch per week of snuff or chew</p>  |
