

ATTENTION VISITORS

Some of our residents are experiencing **vomiting** and/or **diarrhea**. Please follow the precautions illustrated below during your visit or consider visiting at another time.

Healthy Visitors

Alcohol-based hand sanitizers do not work well against some gastrointestinal germs. For the best protection, **wash your hands**:

- Upon arrival
- Before handling food or medicine
- After using the bathroom
- Before you leave

Wash hands with soap and water

Please do not visit if you are sick or experiencing symptoms
