

STOP SYPHILIS IN ITS TRACKS

As a health care provider,
you play an important role in
reducing congenital syphilis.

HERE'S HOW YOU CAN DO YOUR PART!

- Complete a sexual health history for all your patients.
- Test all pregnant women for syphilis at the first prenatal visit, between 28-30 weeks gestation, **AND** at delivery.
- Treat patients with syphilis immediately.
- Know mom's delivery syphilis test results before the newborn goes home.
- Immediately report syphilis and congenital syphilis infections to **Public Health**.
