

STOP SYPHILIS IN ITS TRACKS

Screen Patients Presumptively for Better Health Outcomes!

As a health care provider,
you play a vital role in
supporting the MSM
community in
reducing syphilis rates.

HERE'S HOW YOU CAN DO YOUR PART!

- Complete a sexual health history for all your patients.
- Test sexually active MSM for syphilis, including those with HIV infection, at least annually, and as frequently as every 3 to 6 months for frequent unprotected sexual exposure.
- Immediately treat all people with syphilis and provide information to **Public Health**.
