

# STOP SYPHILIS IN ITS TRACKS

As a health care provider,  
you play a vital role in  
supporting the MSM  
community in reducing  
syphilis rates.

## HERE'S HOW YOU CAN DO YOUR PART!

- Complete a sexual health history for all your patients.
- Test sexually active MSM for syphilis, including those with HIV infection, at least annually, and as frequently as every 3 to 6 months for frequent unprotected sexual exposure.
- Immediately treat all people with syphilis and provide information to **Public Health**.
