

Statewide Key Messages

The average weekly rate of heat-related illness (HRI) emergency department (ED) visits **this season to date is 3 per 100,000 population.**

This week (July 12-18, 2026):

- There were **530*** HRI ED visits (0.5% of total ED visits), with a **rate of 4.9 per 100,000 population**
- The rate was highest among **males aged 25-44 years (10 per 100,000 population)** (Figure 1)
- The rate of HRI ED visits was highest in the **Sandhills (6.6 per 100,000 population)**, (Figure 2; Region 7)
- The most frequent heat related diagnosis code was **heat exhaustion (n = 171; 58.4%)** (Table 1)
- The maximum daily heat index ranged from **86 to 93.6°F** at Raleigh-Durham International Airport (Figure 3)
- There were **2** days when the minimum temperature was above 70°F.

Southeast (Region 1) Key Messages

The average weekly rate of heat-related illness emergency department visits **this season to date** is **3.2 per 100,000 population**.

This week (July 12-18, 2026):

- There were **58 HRI ED visits** (0.7% of total ED visits), with a rate of **6.4 per 100,000 population**
- The rate was highest among **males aged 25-44 years (15.2 HRI ED visits per 100,000 population)** (Figure 1)
- The rate of HRI ED visits was highest in **New Hanover County (10.2 per 100,000 population)** (Figure 2)
- The most frequent heat related diagnosis code was **heat exhaustion (n = 16; 51.6%)** (Table 1)
- The maximum daily heat index ranged from **87.9 to 100.1°F** at Wilmington International Airport (Figure 3)
- There were **4 days** when the minimum temperature was above 70°F.

Figure 2. Average Weekly Rate of Heat-Related Illness Emergency Department Visits per 100,000 Population Southeast (Region 1)

Rates based on counts between 1-4 are suppressed for counties with less than 500 total ED visits, as shown in gray.

North Central (Region 2) Key Messages

The average weekly rate of heat-related illness emergency department visits **this season to date** is **2.7 per 100,000 population**.

This week (July 12-18, 2026):

- There were **95 HRI ED visits** (0.5% of total ED visits), with a rate of **4.4 per 100,000 population**
- The rate was highest among **males aged 45-64 years (10.9 HRI ED visits per 100,000 population)** (Figure 1)
- The rate of HRI ED visits was highest in **Rockingham County (13 per 100,000 population)** (Figure 2)
- The most frequent heat related diagnosis code was **heat exhaustion (n = 29; 58%)** (Table 1)
- The maximum daily heat index ranged from **78.1 to 88.4°F** at Piedmont Triad International Airport (Figure 3)
- There were **2 days** when the minimum temperature was above 70°F.

Northeast (Region 3) Key Messages

The average weekly rate of heat-related illness emergency department visits **this season to date** is **3.9 per 100,000 population**.

This week (July 12-18, 2026):

- There were **12 HRI ED visits** (0.5% of total ED visits), with a rate of **6.1 per 100,000 population**
- The rate of HRI ED visits was highest in **Pasquotank County (9.8 per 100,000 population)** (Figure 2)
- The most frequent heat related diagnosis code was **heat exhaustion (n = 5; 62.5%)** (Table 1)
- The maximum daily heat index ranged from **85.4 to 96.1°F** at Pitt-Greenville Airport (Figure 3)
- There were **3** days when the minimum temperature was above 70°F.

Figure 2. Average Weekly Rate of Heat-Related Illness Emergency Department Visits per 100,000 Population

Rates based on counts between 1-4 are suppressed for counties with less than 500 total ED visits, as shown in gray.

Figure 3. Emergency Department Visits for Heat-related Illness and Daily Maximum Heat Index Northeast (Region 3): May 1 - July 18, 2026

Figure 1 is not provided for the Northeast region this week due to the small number of ED visits for heat-related illness.

South Central (Region 4) Key Messages

The average weekly rate of heat-related illness emergency department visits **this season to date** is **2.8 per 100,000 population**.

This week (July 12-18, 2026):

- There were **116 HRI ED visits** (0.4% of total ED visits), with a rate of **4.4 per 100,000 population**
- The rate was highest among **males aged 25-44 years (11 HRI ED visits per 100,000 population)** (Figure 1)
- The rate of HRI ED visits was highest in **Montgomery County (19.2 per 100,000 population)** (Figure 2)
- The most frequent heat related diagnosis code was **heat exhaustion (n = 38; 54.3%)** (Table 1)
- The maximum daily heat index ranged from **86.3 to 94.5°F** at Charlotte/Douglas International Airport (Figure 3)
- There were **3 days** when the minimum temperature was above 70°F.

Figure 2. Average Weekly Rate of Heat-Related Illness Emergency Department Visits per 100,000 Population South Central (Region 4)

Rates based on counts between 1-4 are suppressed for counties with less than 500 total ED visits, as shown in gray.

North Coastal Plain (Region 5) Key Messages

The average weekly rate of heat-related illness emergency department visits **this season to date** is **2.6 per 100,000 population**.

This week (July 12-18, 2026):

- There were **97 HRI ED visits** (0.5% of total ED visits), with a rate of **4.3 per 100,000 population**
- The rate was highest among **males aged 20-24 years (8.2 HRI ED visits per 100,000 population)** (Figure 1)
- The rate of HRI ED visits was highest in **Edgecombe County (20.5 per 100,000 population)** (Figure 2)
- The most frequent heat related diagnosis code was **heat exhaustion (n = 28; 56%)** (Table 1)
- The maximum daily heat index ranged from **85.5 to 92.9°F** at Rocky Mount-Wilson Regional Airport (Figure 3)
- There were **2 days** when the minimum temperature was above 70°F.

Foothills (Region 6) Key Messages

The average weekly rate of heat-related illness emergency department visits **this season to date** is **3.2 per 100,000 population**.

This week (July 12-18, 2026):

- There were **18 HRI ED visits** (0.4% of total ED visits), with a rate of **3.8 per 100,000 population**
- The rate was highest among **females aged 25-44 years (7.5 HRI ED visits per 100,000 population)** (Figure 1)
- The rate of HRI ED visits was highest in **Rutherford County (9.2 per 100,000 population)** (Figure 2)
- The most frequent heat related diagnosis code was **heat exhaustion (n = 4; 50%)** (Table 1)
- The maximum daily heat index ranged from **78.3 to 89.2°F** at Morganton-Lenoir Airport (Figure 3)
- There were **2 days** when the minimum temperature was above 70°F.

Sandhills (Region 7) Key Messages

The average weekly rate of heat-related illness emergency department visits **this season to date** is **3.8 per 100,000 population**.

This week (July 12-18, 2026):

- There were **86 HRI ED visits** (0.7% of total ED visits), with a rate of **6.6 per 100,000 population**
- The rate was highest among **males aged 45-64 years (13.2 HRI ED visits per 100,000 population)** (Figure 1)
- The rate of HRI ED visits was highest in **Bladen County (20.3 per 100,000 population)** (Figure 2)
- The most frequent heat related diagnosis code was **heat exhaustion (n = 33; 66%)** (Table 1)
- The maximum daily heat index ranged from **87.8 to 98.4°F** at Fayetteville Regional/Grannis Field Airport (Figure 3)
- There were **3 days** when the minimum temperature was above 70°F.

Mountains (Region 8) Key Messages

The average weekly rate of heat-related illness emergency department visits **this season to date** is **1.2 per 100,000 population**.

This week (July 12-18, 2026):

- There were **9 HRI ED visits** (0.1% of total ED visits), with a rate of **1.1 per 100,000 population**
- The rate was highest among **males aged 45-64 years (2 HRI ED visits per 100,000 population)** (Figure 1)
- The rate of HRI ED visits was highest in **Henderson County (1.7 per 100,000 population)** (Figure 2)
- The most frequent heat related diagnosis code was **heat exhaustion (n = 7; 87.5%)** (Table 1)
- The maximum daily heat index ranged from **75.9 to 79.8°F** at Asheville Regional Airport (Figure 3)
- The daily minimum temperature was below 70°F on all **7 days** this week.

About the data

The heat-related illness data in the report is from NC DETECT. NC DETECT is a statewide public health syndromic surveillance system, funded by the NC Division of Public Health (NC DPH) Federal Public Health Emergency Preparedness Grant and managed through collaboration between NC DPH and the UNC-CH Department of Emergency Medicine's Carolina Center for Health Informatics. The NC DETECT Data Oversight Committee is not responsible for the scientific validity or accuracy of methodology, results, statistical analyses, or conclusions presented.

Climate data

The maximum heat index and minimum temperature data in this report are from the North Carolina State Climate Office. The Raleigh-Durham International Airport weather station (RDU) was selected to represent the climate data for the statewide report. One weather station from each region was selected to represent the climate data for each region. The weather station locations and their corresponding regions are as follows:

Wilmington International Airport (ILM) – Southeast (Region 1), Piedmont Triad Airport (GSO) – North Central (Region 2), Pitt-Greenville Airport (PGV) – Northeast (Region 3), Charlotte/Douglas International Airport (CLT) – South Central (Region 4), Rocky Mount-Wilson Regional Airport (RWI) – North Coastal Plain (Region 5), Morganton-Lenoir Airport (MRN) – Foothills (Region 6), Fayetteville Regional/Grannis Field Airport (FAY) – Sandhills (Region 7), Asheville Regional Airport (AVL) – Mountains (Region 8). During 6/19, climate data was obtained from the NC School of Science and Math - Morganton (MORG) EcoNet weather station (Foothills, Region 6).

The NCDHHS Climate and Health Program is supported by the Centers for Disease Control and Prevention of the U.S. Department of Health and Human Services (HHS) as part of a financial assistance award totaling \$500,000 annually with 100 percent funded by CDC/HHS. The contents are those of the author(s) and do not necessarily represent the official views of, nor an endorsement, by CDC/HHS, or the U.S. Government. Award No. (Award No. 6NUE1EH001449-03-02).

This report is available on the NC DHHS Climate and Health website at <https://www.dph.ncdhhs.gov/programs/epidemiology/occupational-and-environmental-epidemiology/climate-and-your-health/extreme-heat/nc-heat-health-data-and-reports>
