

Rabies Exposure Comment in NCIR

Search for the patient in NCIR

Choose the CLIENT COMMENTS tab:

Choose the highlighted client comment from the dropdown:

Make sure you enter an Applies to date:

Make sure you click Next and verify that it moves to the client comment listing section:

Document a Historical Rabies Dose

Click History/Recommend

You should see the comment at the top of the screen in red.

It will also add recommendations for rabies vaccines in the Vaccines Recommended by Selected Tracking Schedule section

☒	Polio	08/01/2024	08/01/2024	08/01/2024
☒	Rabies	08/02/2026	08/02/2026	08/02/2026
☒	Td	08/01/2013	08/01/2013	08/01/2013

To enter the dose - click New Immunization Entry (if you administer the dose):

Click the check box in the New column

Select the Ordering Authority, Administered By and Date Administered and click OK

Select the Eligibility, Trade Name from the dropdown, Body Site, and Route

Click OK

The dose should be added to the History section:

The recommendations should be updated with the next dose date:

☒	Polio	08/01/2024	08/01/2024	08/01/2024
☒	Rabies	08/08/2026	08/08/2026	08/09/2026
☒	Td	08/01/2013	08/01/2013	08/01/2013

If you did NOT administer the dose but need to add it to a record, follow the steps above to search for a patient and add the client comment. Then select Historical Immunization on the history/recommend screen.

Scroll down to the Add Vaccine Group section:

Choose Rabies from the dropdown

Enter the facility details where the dose was administered (or "Reported by" and your facility name if unknown) and the date of administration:

Scroll back up and click Tradename Details if you have the trade name and/or lot number information:

Choose the Trade Name from the dropdown and/or fill in the lot number. Click Save.

If you use data exchange, please ask your vendor to send the concept code "VXC7" in the OBX 5.1 segment to apply the rabies exposure comment to the patient record.
